October 27, 2014

Letter of Recommendation

To Whom it May Concern:

Adrian Ababei has worked with REDspace since July 10th, 2014. During this time, he has been a knowledgeable, dependable Drupal and PHP development resource who is always on-time, on-task and ready to assist in a team environment.

Adrian has been a valuable asset to REDspace (A services shop specializing in website, app and custom services development). He has always been cheerful and willing to assist with any task. He has contributed in a team environment and worked promptly to address tickets/issues on the project he is involved with. Adrian is also motivated and interested in learning new things.

Due to an unexpected reduction in hours/budget from the client of the project Adrian is working on, we needed to reduce his hours. This reduction in hours/budget has nothing to do with Adrian and his skills and I would highly recommend him as a strong developer in both Drupal and PHP. He has demonstrated a thorough understanding of Drupal and backend coding and would be a great addition to any team or as a solo developer.

Sincerely,

Jay McCurdy
